

5.5 million candidates and 250,000 updates every month.

The iProfile data exchange makes it simpler than ever to improve the quality of your internal talent pool, reduce your advertising spend and place more candidates.

Recruitment is evolving, join the evolution.

Recruiter Benefits

Reduce short-listing time by up to 50%

iProfile Recruiter provides your consultants with highly accurate candidate shortlists.

Never lose track of a candidate again

You'll receive updates on your candidates, no matter how long ago they registered with you.

Reduce advertising spend

With greater access to available candidates you can reduce your reliance on advertising.

Win more business

Attract more clients based on improved efficiency and the quality of your talent pool.

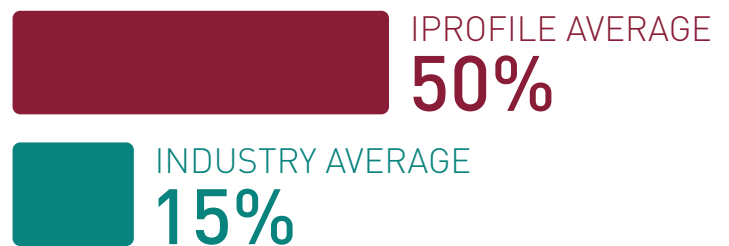

How It Works

The iProfile exchange aggregates candidate data from recruiters, candidates, jobs boards and CV libraries.

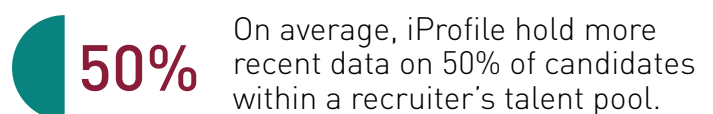

The exchange receives over 250,000 candidate updates a month but will only deliver these to recruiters, with whom they have a pre-existing relationship.

On average, the exchange delivers 27 updates for each one submitted by a recruiter.

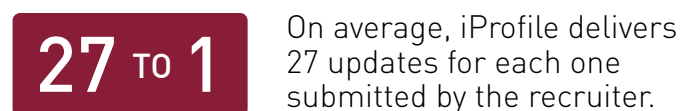

Data Updated Within The Last Year

iProfile Data Vs Recruiter Data

Updates Received and Submitted

Within two years of using iProfile, the number of placements from our database has gone from 20% to 50%, and our advertising spend has reduced by 45%
